**Student Learning Outcomes (SLO's):** After completion of this course, students will be able to:

1. Use correct notation and mathematical precision in the evaluation and interpretation of derivatives and integrals
2. Evaluate, solve, interpret, and communicate business and social science applications using appropriate differentiation and integration methodologies.

**Prerequisite:** Math 11 (Finite Math) or Math 41 (Pre-calculus I)

**Materials:**

- Use of **WebAssign** (<http://www.webassign.net>) **is required** in this course. You will submit your homework online using WebAssign. To access the class on WebAssign, you must purchase access code, either from De Anza book store or directly from the publisher's website, and self enroll. - **Textbook (optional):** Applied Calculus for the Managerial, Life, and Social Sciences, 10th Ed., by Soo Tan

*\*Note: An e-version (PDF) of the textbook is included with the purchase of WebAssign online access code. So, if you prefer, you can purchase only the online access code and read the textbook in PDF format. This provides cost savings, but you will not have access to the textbook without Internet access. Students may also purchase codes online at [www.webassign.net](http://www.webassign.net) which includes access to the e-book.*

**Grading:**

- **Homework (10%):** submitted via WebAssign **once a week**.
- **Quizzes (15%):** 6 in-class quizzes will be given. The quiz with the lowest score will be dropped. Second lowest quiz will be replaced with the average of the three midterms (if that improves your grade).
- **Exams (45%):** There will be **3 one-hour midterms** (15% each). Your lowest exam score will be replaced with your final exam score if that improves your grade. You may be asked to show a photo ID when taking each exam.
- **Final Exam (30%):** Final exam is **comprehensive and must be taken on the scheduled date**. If you miss the final exam, you will not pass the class. You may be asked to show a photo ID when taking the final exam.
